🌐 <u>Portfolio</u>

With over 3 years of experience focused on web application development, I consistently deliver projects that exceed client needs and industry standards. I specialize in following best practices, maintaining clean and well-documented code for reusability, optimization, and scalability. I'm passionate about tackling new challenges and solving complex problems, as each project is an opportunity to learn and improve. My enthusiasm for technology drives me to surpass expectations and find innovative solutions at every stage of development.

WORK EXPERIENCE

"Estaciona chivilcoy" - Backend Developer
Freelance Highlight Project. August 2023

- I was responsible for designing and developing the application's backend, integrating technologies like Node.js, Express.js, Firebase, and MercadoPago for transactions.
- I implemented essential and additional endpoints for the application's functionality, including one to view parking availability in real-time and make reservations. I enhanced the app's self-management by automatically detecting expired parking using Firebase.

Freelance - Desarrollador Fullstack
2021 - Present

- Design and development of landing pages, e-commerce sites, and portfolios for clients and developers in Spanish and English. Developed promotional websites and e-commerce solutions.

EDUCATION

2022 - Presente
APX School (bootcamp)
Fullstack Web Development

2013 - 2020
Technical School with a focus on Computer Science
Personal and Professional Computer Technician
